- AJAX/HTTP

Profile

Full stack JavaScript Web Developer with knowledge of the MERN stack, seeking employment as a junior web developer. Hard-working, collaborative, and motivated individual in the process of switching into a career in software development.

Projects

BookMark

This project involved using the Google Books API in React to build a book database in which a user could search for books and save them in separate lists. It was a good practice of React concepts including router, context, and hooks, as well as and handling API calls and responses.

Education

Full Stack JavaScript Web Development | V School

November 2019 – March 2020

Psychology | Whitman College (Walla Walla, WA)

September 2012 – May 2015

Earned 2.5 years worth of credits for a BA in psychology. Interested in completing that undergraduate program or switching to a CS program.

Past Employment

Valter's Osteria – Salt Lake City, UT

Busser | May 2019 – November 2019

Learned the work ethic of the front-of-house staff of a fine dining Italian restaurant. Aided servers in most tasks (resetting between courses, preparing bread, reconfiguring settings for certain meals, cleaning and resetting tables, reorganizing tables for different sized parties, etc). Extremely demanding, this job required me to work harder than ever before, and forced me to develop some serious grit.

Este Pizza – Salt Lake City (Sugarhouse)

Cook / Kitchen Manager | March 2017 – January 2019

This was my first managerial experience (from Aug. 2018 to end), and I gained valuable insight into the difficulties and joys of managing a team of people. Besides the technical skills of making pizza and the speed required in a kitchen, I learned composure under the stress of seemingly endless ticket orders, interpersonal skills of working with a wide variety of people, and the ability to make executive decisions in time-sensitive situations.
